

Safety in Numbers

This year, more than 405 million business people will embark on journeys. They will arrive in more than 77 countries and 6.5 million cities worldwide. More than 25 million flights and 590 million vehicles will take them there. Approximately one out of 30 of these journeys will be tragically interrupted. Medical emergencies will hospitalize an estimated 13.5 million travelers. A lucky few will have a team of more than 100 guardians on their side. All working 24 hours a day, 365 days a year, to counter the odds of catastrophe. Because when it comes to the thousands of lives we protect, our number one goal is safety.

A world leader in medical evacuation, MedjetAssist provides a calm path through the chaos. If one of your employees is hospitalized more than 150 miles from home, MedjetAssist will arrange transportation to the hospital of their choice anywhere in the world. MedjetAssist provides discounted corporate/group rates for companies with as few as three employees. Companies without MedjetAssist must pay an average of \$10,000 to \$20,000 for a domestic medical evacuation. International transports can cost a company \$100,000 or more. Your company pays the yearly corporate membership fee, nothing more.

With MedjetAssist there are:

- No medical necessity clauses
- No transport cost caps
- No additional fees
- No pre-existing condition exclusions up to age 75
